

Pershing Made A Full General By Senate Vote

Nomination to Highest Military Rank Confirmed Unanimously; Senators Rise as Mark of Honor

Phelan Leads Applause

Missourian Said to Have Commanded Greatest Expedition of All History

WASHINGTON, Sept. 4.—Amid applause from Senators and spectators, the Senate today in open executive session unanimously confirmed the nomination of John J. Pershing to the permanent rank of general of the regular army, as a reward for his services as commander of the American expeditionary forces. As a mark of special honor a rising vote was taken.

The special act reviving the rank of general Pershing makes his title "General of the Armies of the United States" and provides that no officer shall take precedence in rank over him. The rank has not been held since the death of General Sherman.

At the request of Senator Thomas, Democrat of Colorado, Senators rose to record their votes, and when Vice President Marshall announced that the nomination had been confirmed, Senators, led by the applause which swept the floor and galleries.

Australian Troops to Study Farming in U. S.

Many Australian and Canadian soldiers arrived yesterday from the White Star liner Celtic from Liverpool with 373 passengers. There were 230 first class, ninety-second class and fifty-third class passengers.

The passport bureau is particularly near a breakdown, said Mr. Lansing, owing to the increasing number of persons desiring passports. The number probably reached 11,000 in August, he said.

Three other departments in need of additional help, he said, are the consular bureau, the solicitor's department and the trade advisers. In the solicitor's department, he said, there are now pending 5,000 claims against Germany and 1,000 against Mexico.

Cramping of the latter advised by the House Appropriations Committee to assist American trade abroad.

Experts or Theorists—Which?

The packing industry is intricate, complex—far more so than the railroads or the telegraph.

Every day multiplying needs of society increase its problems and multiplying responsibilities demand more of it.

Highly trained experts, specialists of years' experience, thinkers and creative men, devote their energies, their activities, to solving the problems of the packing industry and meeting its widening duties.

Swift & Company is not a few dozen packing plants, a few hundred branch houses, a few thousand refrigerator cars, and a few million dollars of capital, but an organization of such men. It is the experience, intelligence, initiative and activity which operates this physical equipment.

Can this intelligence, this experience, this initiative and creative effort which makes this business at a profit of only a fraction of a cent per pound from all sources, be fostered through the intervention of political theorists, however pure their purposes? Or be replaced by legislation? Does Congress really think that it can?
